Frequently Asked Questions

What is the difference between Standard and Sustaining membership?

While Standard membership allows access to all core benefits, Sustaining membership was designed for super-users who know they are going to use certain benefits and want to save while also supporting the work that Humentum does. For many, the \$1,280 value of free registrations to learning events covers the cost difference between Standard and Sustaining membership levels. For others, the deep discounts on eCornell courses and Humentum's job board provide the value they need.

What is the difference between Humentum Membership and HLS (Humentum Learning Services)?

Humentum Membership is an institutional membership model that focuses on helping to solve operational problems through building community, learning, and thought leadership. Humentum Learning Services (HLS) is a customizable e-learning solution that helps organizations provide their staff quality online learning. It includes platforms, eLearning creation tools, courses, and a community of learning and development peers. While many organizations are both Humentum Members and HLS subscribers, not all are.

How can Humentum membership help me...

...learn from my peers?

Community is central. We bring people together daily around the topics that matter most to them, in online listerv communities like Humentum Connect, in regular roundtable calls, and in participatory trainings.

...make good organizational decisions and stay ahead of the curve?

We use spot polls and regular advocacy updates to help members stay informed! Especially now, with change happening at a rapid pace, members have found it helpful to know that we have a pulse on what is happening.

...solve problems?

You're not alone. If you are facing any kind of challenge, chances are others have too and you can access a discussion post, template, webinar recording, spot poll result, workshop, or partner recommendation that will help you move forward. If your challenge is more complex, our consultants have practical experience helping organizations solve difficult problems.

...grow my staff?

If you work for an institutional member, you receive all the benefits! That means access to over 200 self-paced courses in Humentum Explore (including DPro), discounts on formal training, and an entire community of practitioners ready to answer your questions and share resources in Humentum Connect or during roundtables.

You have a dedicated account manager who would be happy to learn about your particular needs and help you create a plan to get your staff engaged, find ways to address your current challenges, and identify ways to save money.
