

NGO Financial Management Consultancy

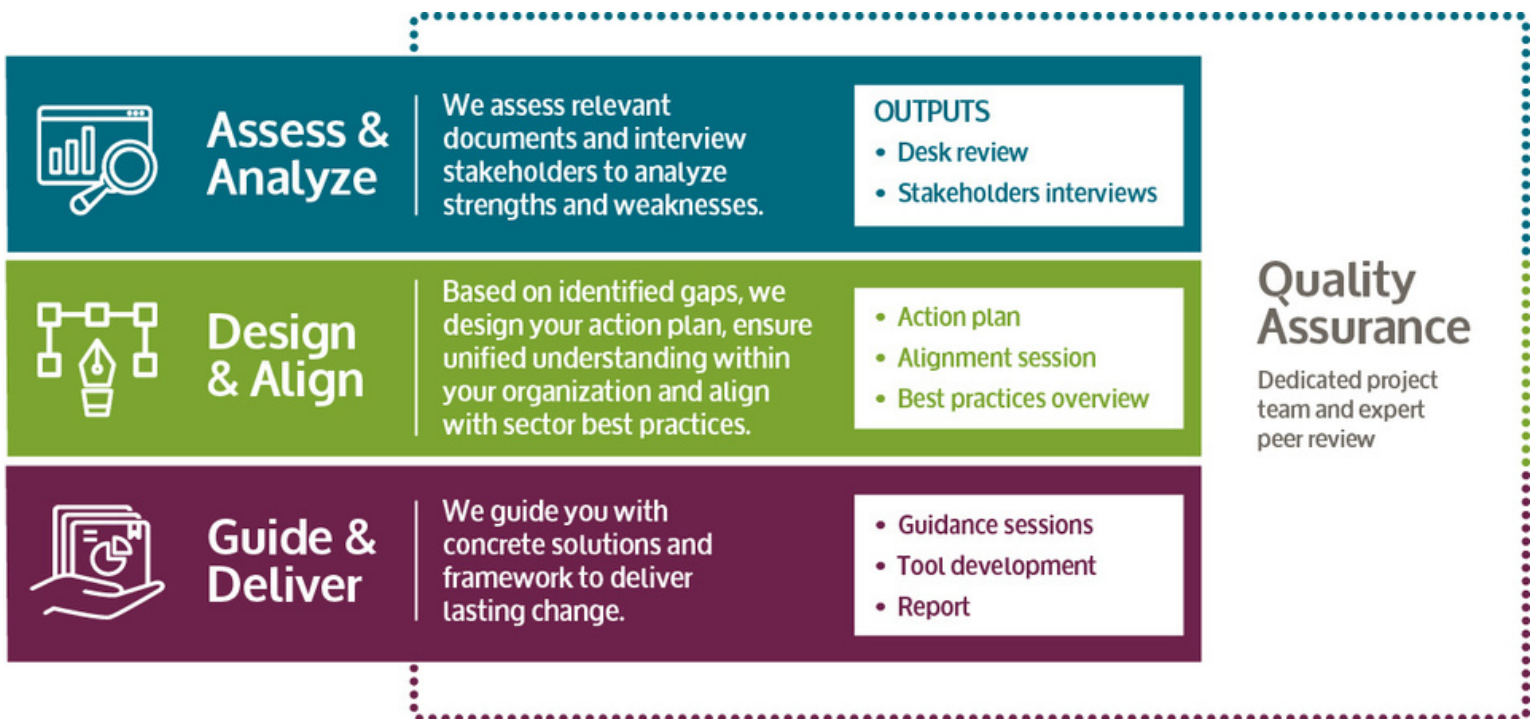

Practical Expertise & Proven Solutions

Even if your NGO has a financial strategy in place, you still need to manage your finances on an ongoing basis. That means strong policies and procedures, staff training, clear roles and responsibilities, transparency (internally and externally), and good systems. Without good financial management integrated throughout your entire organization, you open the door to fraud, confusion, mismanagement, and difficulty tracking your finances.

OUR SOLUTION

Humentum uses a proven three-step approach, outlined below, and led by sector experts in partnership with your team and leadership to build a robust financial management system.

From policies and procedures to setting up internal controls, with a focus on your accounting records, financial planning, and financial monitoring, our Financial Management consultancy will help you put strong financial management systems in place.
